

## Xi Presenter

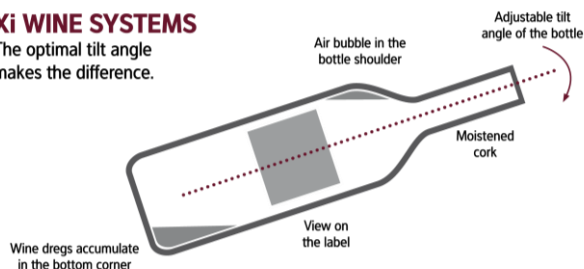

### Modular wine presentation in focus.

The sophisticated modular construction system allows you to build your own customized rack according to your needs. The **Xi Presenter** can easily be fixed on the ground and the wall or ceiling by two flanking aluminum brackets. Due to different tube length and adjustable mounting material the rack can be adjusted to any ceiling height. Furthermore, it is also possible to install one rack right to the next so that (with the possibility of customized widths) you may configurate your own individual wine wall.

- Bottle layer **"Front Gallery"**: Wine bottles are presented from the front in the optimal Xi angle; with a moistened cork at any time, the air bubble on smallest space in the bottle shoulder and the wine dregs accumulated in the bottom corner. Per layer up to 9 bottles á 0,75 liters or 6 bottles x 1,5 liters can be presented.
- Bottle layer **"Side Gallery"**: Wine bottles are presented horizontally from the side. In the width, maximum 2 bottles (0.75 or 1.5 l) can be stored; in the depth maximum 3 per layer.
- Bottle layer **"U-Shelf"**: Bigger quantities of lying/standing bottles and accessories can be stored.
- Bottle layer **"Glass Gallery"**: Glasses can be hanged in the shelf. Up to 6 glasses wide and 2 or 3 glasses deep.
- Wooden parts are made of oak or fumed oak; aluminum and steel parts powder coated in anthracite DB703.
- Per **Xi Presenter** up to 160 bottles can be presented
- Measurements:  
Height pluggable 1265mm (49,8"), individually cuttable up to 3795mm (149,4"). Depth for 3 bottles 380mm (14,96"), for 2 bottles 330mm (12,99"), Width 1. rack 798mm (31,41"), each further plus 768mm (30,24"). The shelves are screwed into drilled holes on the side each 55mm (minimum 110mm distance between shelves)
- The **Xi Presenter** is used mainly in wine cellars, wine walls and wine cooling rooms
- Optional integrated LED lighting available
