

Sentinel Series

Ducted Split Cooling Systems

Protect your wine investment. Wine Guardian's Sentinel Series units are the **strongest and most energy-efficient** wine cellar cooling systems on the market. They provide **optimal temperature and humidity control** for both commercial and residential cellars with a design that allows for easy installation and service. Ducted Split systems are ideal for wine cellars with little to no extra space for a self-contained Wine Guardian system.

The Sentinel Series ducted cooling systems have a broad range of capacities at wine cellar conditions (55-58°F/12-14°C). An optional humidifier can be installed with the ability to achieve 55-65% relative humidity. For more information about our unit specifications, view our specification sheet.

- 1 Versatile**
Can be installed in a variety of locations
- 2 Bold**
A stylish and contoured look for modern homes
- 3 Efficient**
Fully insulated cabinet and duct collars for protection in the most demanding environments
- 4 Comprehensive**
Extended range of temperature and humidity control
- 5 Strong**
The most durable wine cooling system on the market
- 6 Accessible**
Innovative multi-panel design with integral fasteners for easy service and maintenance

Sentinel Series

Wine is your passion. *Preserving it is ours.*

Versatile

The ducted split systems are our **most flexible** units. These systems give you the ability to install the fan coil and condensing unit in a variety of locations. They are ideal for cellars that have limited space, applications where venting is difficult, and cellars that require longer than recommended duct runs.

Bold

A **sleek and modern look** to compliment any wine cellar design.

Efficient

The ducted split system chassis features up to **three times more insulation** than previous versions. New stronger, double wall insulated duct collars insulate 42% more to help reduce temperature loss and condensation even in the most demanding environments.

Comprehensive

Our cooling systems offer a **wide range of control**, so you can match our units to your specific needs. Up to 3 optional remote sensors and 2 remote interface controllers with Wireless2Base™ technology can be added to your unit for easy monitoring and control of your cellar or in whatever room is most convenient for you.

Strong

The Sentinel Series is made of the highest UL rated composite material, features an all aluminum chassis, and contains coated coils to ensure **product durability**. It is five times stronger than our previous model. The unit's construction prevents dents and scratches from installation and shipping.

Accessible

Composite multi-panel design with integral captive quarter-turn fasteners allows for **ease of access** and serviceability. Interchangeable duct collars and solid panels can be simply configured during installation.

Options and Accessories:

- All Wine Temperatures Bundle
- Extreme Climate Protection Bundle
- Remote control, monitoring and sensing
- Duct kits and grilles
- Extended warranties
- Humidification

*Not all options are available for all units. Contact a distributor for more information.

Perfectly Paired

The Ducted Split system features the fan coil unit and the condensing system. Both units were designed by Wine Guardian, ensuring that they **work together** properly.

Optional Integrated Humidifier
